Maya Lin

Austin, TX | (512) 555-0194 | maya.lin.example@email.com | linkedin.com/in/mayalin-dev

SUMMARY

Detail-oriented Full-Stack Software Engineer with 5 years of experience building scalable web applications and cloud-native APIs. Skilled in Python, React, and AWS infrastructure, with a proven track record of reducing system latency and improving user retention.

EXPERIENCE

Software Engineer II — *Bluebonnet Cloud Systems, Austin, TX* *March 2023 – Present*

- Architected a microservices billing pipeline using Python and FastAPI, reducing transaction processing time by 35%.
- Collaborated with product designers to overhaul the customer dashboard in React and TypeScript, boosting daily active user engagement by 18%.
- Mentored three junior developers through weekly code reviews and pair-programming sessions.

Junior Web Developer — *Lone Star Digital Agency, Austin, TX* *June 2021 – February 2023*

- Built and maintained 15+ responsive client websites using JavaScript, HTML5, CSS3, and Node.js.
- Integrated third-party payment gateways and CRM tools, streamlining client lead capture workflows.
- Automated deployment pipelines using GitHub Actions and Docker, cutting release times in half.

EDUCATION

B.S. in Computer Science — *University of Texas at Dallas* *2021*
